

Leader Performance Enhancement Process™

Our leadership development and executive coaching services align the executives with their team and management supporting the organization's business goals and strategic areas of focus. The aim of the service is to improve the leadership performance of our clients and as a result, achieve higher business results. We deliver substantial results that positively affect the bottom line. We believe in accountability-based coaching, monitoring and measurement during the engagement.

Coaching Benefits

Working with senior executives and managers, our clients typically report the following benefits:

- Executives increase their impact, effectiveness and organization performance.
- Executives get the essential development found only from a qualified and independent coach.
- Increased retention of key executives and improved morale.
- Succession planning is improved with stronger bench-strength insured through coaching.
- Improved ROI on leadership training investments.
- Retention of highly valuable executives that have displayed derailing leadership in the past.

Leader Performance Enhancement Process™

We deploy a proven process combined with our highly experienced and skilled coaches. The major steps in our process include:

Our Coaches

Our coaches are carefully selected and certified by us and we select based on the following criteria:

- Business-focused, with breadth of experiences across industries and functions.
- Track record of implementing actions to address enterprise-wide issues.
- Held senior leader roles in the past.
- Minimum of 15 years general business experience with advanced degrees.
- Certified in the coaching process and continuously monitored for quality.
- Especially skilled in building rapport and trust, and motivating executives to change
